Frederick Health Opens New Services at The Village Location

Frederick, MD – January 16, 2022, Frederick Health, the largest healthcare provider in Frederick County, has expanded its outpatient facilities at its Frederick Health Village location. Beginning this month, the Precision Medicine & Genetics (PMG) Program and the Medical Weight Loss Program will see patients at The Village. Frederick Health's Laboratory Services will also open another location at this site, the ninth laboratory collection center within the healthcare system.

Frederick Health has continued to strategically expand its network of programs and facilities. Adding these service lines to The Village marks the first time patients will be seen inside this location. Many residents are familiar with The Village, as this location served as the primary COVID-19 testing facility for Frederick County and the surrounding areas.

"We are pleased to begin offering outpatient services at our Village location. Since acquiring this property in 2019, our goal has been to continue developing this site into a premier healthcare facility. As our network grows in future years, more patient services will be located at The Village." said Cheryl Cioffi, Senior Vice President & Chief Operating Officer of Frederick Health.

The Precision Medicine & Genetics Program is a first for area residents. This program's focus is on developing a care plan based on a patient's unique genetics. This state-of-the-art program was recently named one of the Top 50 innovators in Frederick County. Frederick Health is also the first community healthcare system in the country to fully integrate a patient's unique genetic profile into their Electronic Health Records (EHR).

In addition to PMG, Frederick Health's Medical Weight Loss Program assists patients with nutrition and lifestyle changes without surgery. Laboratory Services offers comprehensive testing in several specialties and is accredited by the prestigious College of American Pathologists.

"The future of medical care is customized medicine based on patient's genetics," said Pat Rice, Clinical Director for the Precision Medicine & Genetics Program.

"With this location, we can increase awareness and participation in this award-winning program," continued Rice.

By expanding access to these convenient, innovative, and award-winning services, Frederick Health continues to be your community of care. For more information, visit www.Frederickhealth.org/locations.

About Frederick Health
